Multiple fitout options:

— Lunchroom
— Office setup
  2 Bunk Bed
— Table and seating for your team
— Custom container modification based on your requirements

Details

Built with the same high-quality materials as our standard containers and portable buildings, the SCF Crib Room will contribute to the productivity of your workforce. Each unit is construction compliant with all Australian standards and the National Construction Code 2013.

All units are built with a strong focus on safety and security, including lockable steel doors, hardwired smoke alarms with battery backup, internal lighting and windows with fly screens and security mesh.

SCF Crib Rooms are installed with hot and cold water, sink, stainless steel kitchenette bench, split system reverse cycle air conditioning and lighting. There are also provisions for a microwave and refrigerator, which can be installed in depot prior to delivery. A team who can refuel in comfort will be able to complete higher quality work for longer.

Our construction range thrives in harsh environments. Built from steel (including steel doors) with high quality fittings, our units are designed to last so your site runs smoothly.
