40FT SHIPPING
CONTAINER

40ft Shipping Container

The 40ft Shipping Container is twice the length of the 20ft variant, which means twice the internal storage volume. It is a good choice for large sites with a high volume of storage needs.

Key Features

— Wind and watertight
— Pest and vermin proof
— Lashing points at the floor and ceiling to secure your goods
— Wooden floors
— Superior security with a lockbox
— Approx 12.2m H x 2.5m W x 2.6m H

Options

— Lockbox
— Electrical fitout (power and lighting)
— Steel floor
— Transport/Shipping Certification
— Variety of Container Grades available - New or Used
— Additional custom container modifications available including shelving

Details

Built from weathering carbon steel, these units are secure from wind, water, vermin and thieves

The longer and less commonly available 40ft container is suited to large sites with ample space for onsite storage. Measuring just over 12 metres long, these usually do not suit standard residential blocks, although they can be squeezed onto large driveways in some cases.

Given the large internal volume, they are often used for more than just household or business goods storage. They are an affordable and ready-made alternate solution to sheds or workshops. They can store machinery and equipment parts, or be used for site offices or accommodation away from the main building, with some minor modifications.

Whatever you store in your 40ft shipping container, you can rest assured it will be safe.

Specifications

40ft Shipping Container | BX4
Specifications may vary
